## PROFESSIONAL PROFILE

Senior QA Engineer with 16+ years of experience in manual and automated testing across web, backend, desktop and mobile products. Experience includes e-commerce, banking, enterprise, government, SaaS, API and data-intensive systems. Strong in requirements analysis, test design, REST API testing, SQL/data validation, DevTools, log and network analysis, defect investigation and release acceptance. Hands-on Python automation with Pytest and Selenium, Postman Collections and CI/CD. Recent work combines QA engineering with AI-assisted research, automation and experimental validation.

## CORE SKILLS

|                    |                                                                                                                                                                              |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Manual QA          | Requirements analysis, test plans, test cases, checklists, exploratory testing, cross-browser/device testing, acceptance and regression testing.                             |
| Web & DevTools     | Client-server architecture, HTTP methods, requests/responses, headers, status codes, Chrome DevTools: Network, Console, Application, Elements.                               |
| API & Data         | REST API, Postman, Swagger, Newman, curl, payload/response validation, integrations, error handling, SQL, JOIN, PostgreSQL, DBeaver, psql, UI -> API -> database validation. |
| Automation         | Python, Pytest, Selenium, Selenium IDE, UI/backend automation, Postman Collections, Jenkins, GitLab CI, nightly builds, smoke and regression.                                |
| Defects & Process  | Jira, Confluence, TestRail, Zephyr, HP ALM, TFS, YouTrack, SDLC, Agile/Scrum, root cause analysis, release validation.                                                       |
| Monitoring & Tools | Grafana, New Relic, Kibana, ELK, Google Analytics, Charles, Proxyman, Android Studio, Figma, VS Code, PyCharm, Windows, Ubuntu, Git, JMeter.                                 |
| AI in QA           | AI-assisted requirements analysis, test-data preparation, edge-case discovery, validation scripts and test-strategy selection.                                               |

## PROFESSIONAL EXPERIENCE

### ML/AI Engineer / QA Automation - ST1.SH outsourcing project | Jan 2026 - Sep 2026

Python/Bash orchestration and research environment for three BTC strategies.

- Developed ST1.SH, a Python/Bash orchestrator for Trade/dry-run, Backtest, Lookahead, Hyperopt and A/B research workflows.
- Implemented and validated ML/AI signal models and feature pipelines using extrema/pivot/wick, EMA, RSI, BB, ATR, ZigZag, find\_peaks, EMD and sequence logic.
- Built reproducible optimization workflows with Hyperopt, 30-day backtests, holdout validation, deterministic seeds, adaptive repeats and candidate selection.
- Implemented supervisors, carousel execution, state/checkpoints/resume, recovery and typed control API to prevent conflicting restarts.
- Conducted A/B research cycles, compared metrics, validated candidates and preserved run-state, manifests, checkpoints and diagnostic artifacts.
- Developed Linux/Ubuntu CLI tooling and race-safe diagnostics using /proc/SSH, logs and archives; performed regression/self-tests and deployment validation.

### Senior QA Engineer - Rorgii | Jan 2025 - Dec 2025

Project work: SSO implementation and support for StarSteer and Solo desktop products.

- Performed full-cycle manual and automated testing of C++/Qt and .NET desktop applications.
- Validated UI, backend logic, databases, SSO, geological algorithms, data processing and visualization.
- Created and maintained test plans, test cases and regression scenarios in TestRail; managed defects in Jira.
- Supported Python/Pytest UI and backend automation; analyzed failures and prepared defect reports.
- Validated well-data loading, interpretation and visualization: LAS files, curves, logs, maps and interpretations; tested 3D visualization with OpenGL and DirectX.
- Worked with C++/Python developers, geologists, petrologists and other specialists; participated in grooming, planning, retrospectives and requirements validation.
- Supported Jenkins/GitLab CI, nightly builds, smoke tests, release candidates, Grafana and New Relic; used English for technical communication and documentation.

### Senior QA Engineer - MTS | Dec 2023 - Jan 2025

API Marketplace and internal services.

- Owned the QA cycle from requirements analysis and test documentation through release acceptance.
- Planned and coordinated API Marketplace testing, including schedules and blockers.
- Performed manual and automated REST API testing with Postman, Swagger, curl and Postman Collections.
- Analyzed requests/responses, payloads, headers, status codes, error handling and service integrations.
- Developed and maintained Python/Pytest backend automation for critical business scenarios.
- Used SQL for data validation, debugging, analytics, log analysis and report verification; worked with GitLab CI/CD.
- Prepared test plans, checklists, scenarios, defect reports and coverage reports; worked with developers, analysts and product managers in Agile/Scrum.

### Senior QA Engineer - Mirage Plaza | Jan 2023 - Aug 2023

High-load Web3 gaming portal.

- Performed full-cycle testing of a high-load web portal, covering functional and non-functional requirements.
- Created test scenarios and cases for functionality, performance, compatibility, security, frontend and backend.
- Tested across browsers and platforms, including REST API; performed regression and security checks.
- Investigated issues with developers and documented defects, risks and results.

### **QA Engineer - Soft Company | Sep 2020 - Jan 2023**

Government information systems: PFR, KSP, FO, NSI and VIO.

- Performed full-cycle testing and contributed to QA process improvements and coordination.
- Prepared test environments, deployed versions through GitLab, analyzed specifications and prepared test data.
- Tested REST APIs with Swagger/Postman; validated databases with SQL in DBeaver.
- Maintained regression automation in Selenium IDE and tested a mobile application with Expo Go.
- Worked with Jira/Confluence and performed modular, integration, system, automated, manual, functional, load, stress and security testing.

### **Test Engineering Expert - Greenatom, Rosatom | Mar 2019 - Aug 2020**

Enterprise software products.

- Performed full-cycle testing and coordinated QA process improvements.
- Created, reviewed and executed tests in TFS; tested REST APIs in Swagger.
- Managed defects and worked directly with analysts and developers; participated in Agile planning.

### **Senior QA Engineer - SberTech | Dec 2017 - Feb 2019**

Online banking for legal entities.

- Performed full-cycle testing of banking products for corporate customers.
- Tested payments, accounts, business processes, roles, integrations and data flows.
- Created and executed tests in HP ALM; managed defects in Jira and collaborated through Confluence.
- Participated in Agile activities and release validation.

### **Senior QA / Head of Monitoring Team - Lazada | Jul 2013 - Jul 2015**

E-commerce platform, Vietnam.

- Performed manual cross-browser testing and supported UI automation with Selenium IDE and Jenkins.
- Tested Android/iOS applications and mobile emulators; performed integration and regression testing in TestRail.
- Promoted to Head of Monitoring Team; hired and managed team members and established internal processes and monitoring tools.
- Monitored errors, user journeys and key business metrics using Google Analytics and New Relic; managed incidents and defects in Jira.

### **Senior QA Engineer - Lamoda | Jan 2011 - Apr 2013**

Large e-commerce platform and mobile applications.

- Performed manual and automated testing with Selenium IDE and Jenkins.
- Performed user acceptance testing and server-side QA; created checklists, test suites and test cases.
- Tested REST API with Swagger, maintained Selenium IDE regression scripts and performed cross-browser testing.
- Tested Android and iOS applications.

### **Senior QA Engineer - Mebelrama | Mar 2009 - Feb 2011**

Magento EE e-commerce platform.

- Performed user testing and backend QA; managed Jira defects and created checklists, test cases and test suites.
- Validated browser compatibility and mobile web experience.

### **QA Specialist - RBC | Jan 2007 - Feb 2009**

Web portals and online services.

- Tested web portals including pochta.ru, ziza.ru, photofile.ru and loadup.ru across browsers and mail clients.
- Created test cases, tested PDA/WAP versions and managed defects in YouTrack.

## **EDUCATION**

- Moscow State Agroengineering University named after V. P. Goryachkin - Bachelor's degree, Information Technology in Economics and Information Systems Administration, 2006.
- Moscow College of Instrument Engineering - Software of Automated Systems / Programmer, 2000.

## **CERTIFICATIONS & COURSES**

- ISTQB Foundation Level - SberTech, 2018.
- Agile Software Development - Rosatom Corporate Academy, 2020.

## **LANGUAGES**

- Russian - native.
- English - C1, advanced.
- Vietnamese - A1, basic.
- Ukrainian - A1, basic.

## **ADDITIONAL INFORMATION**

- Driving licence: Category B.
- Professional reference: Yuriy Vasiyarov - CTO, ZOOD; former EVP, Lazada Group.
- Interested in practical QA work: finding real product problems, explaining them clearly and helping teams release stable products. Previous experience includes team and remote staff management, manual testing and detailed technical defect investigation.
